CalJOBS: California Job Opening Browse System

The Internet is one of the best places to find jobs. Use this handy guide to find locations in your community where you can access the Internet free of charge.

Using computers, employers enter job openings in this system, and job seekers search for positions they are qualified for. Anyone who has been issued a social security card and who has a legal right to work in California can search the CalJOBS system. Everything from entry-level to executive jobs may be listed on CalJOBS.

Once you have your own password, you may use CalJOBS at your convenience. Simply use any computer that has Internet access and open the CalJOBS home page at **<http://www.caljobs.ca.gov>**

Job seekers conduct their own job search. The jobs listed in the California Job Openings Browse System are more detailed than you will find in the newspaper so you may quickly identify jobs for which you are qualified. There is no fee, to the employer or job seeker, to access CalJOBS. The computer has easy on-screen instructions. You can use CalJOBS at your local EDD Job Service Office, at various EDD partner sites (One-Stop Centers), or from your home or office.

You may also put a resume (**Highly Recommended**) into CalJOBS. Employers do have access to CalJOBS and search our site for qualified people. Another advantage to having a resume in

CalJOBS is that you can send your resume to an employer from the computer. If you have a resume in the system and you scroll to the bottom of the job order and you see a box that says: you click on this box and the resume that you have in CalJOBS will be sent to this employer. This will only occur if the employer has access to CalJOBS and uses the resume search option.
